Read this before you proceed

This is a brief overview of what is involved in installing a new flowmeter with a FlowConnect unit. All of the steps listed below are described in full detail the IOM manual. Before you begin, read this sheet carefully.

Step 1 Prepare for installation

- Read the user documentation required for installation.
- Perform an inventory of the parts using the parts list in the IOM manual.
- Assemble the tools you will need for your installation.
- Prepare the site. Plan where to install sensors and solar panel.

Flowmeter IOM manuals

FlowConnect unit IOM manuals

Step 2 Install the flowmeter and activate the FlowConnect unit

Install the flowmeter as described in the IOM manual.

After the flowmeter is installed in the pipe, you will need to attach the antenna, connect the batteries, and attach the tamper evident seal.

Step 3 Install and connect the sensors and solar panel (if applicable)

You may choose to install a pressure sensor, a rain gauge, or a solar panel.

If you have rechargeable batteries, you will need to install a solar panel or an external power supply.

Connect the sensors and solar power cable to the FlowConnect unit on the connection plate.

Step 4 Log on to the web site

Log on to the web site to view the data the FlowConnect device will transmit.
