### **Your trusted partner for flow meters now offers innovative built-in remote meter reading**

FlowConnect™ is a built-in solution for collecting and transmitting flow data from McCrometer's Mc Propeller® and Water Specialties Propeller meters, automating data collection to provide accurate and reliable information for water resource management.

FlowConnect features ExactRead™ Technology for exact match from meter to website. ExactRead samples the digital register directly for its totalizer value, so the numbers are guaranteed to match.

Other Benefits Include:

Affordable and reliable remote meter reading with streamlined design

More frequent data for timely water management decisions

Pre-assembled on new meters for simplified installation

Retrofits on existing meters in less than 30 minutes

&nbsp;

FlowConnect supports water management objectives, including:

Billing & Accounting

Conservation

Regulations & Allocation

Planning & Development

Operations & Metering
