

New Year, New Meter!

Start the year off right with 20.25% off the FL901 Flow Logger with US9001B sensor

Start the new year right with a reliable, budget-saving open channel monitoring solution at a discounted price!

Equipped with the US9001B Sensor, our FL901 Flow Logger bundle offers plug-and-play sensor ports, on-site confirmation, and a quick installation turnaround.

This bundle allows you to make data-enabled decisions with 24/7 access to flow data through FSDATA® Online. Plus, get immediate warnings when system upset threatens and respond immediately.

* includes mini wing antenna

As part of Hach's Flow Solutions by McCrometer, this limited-time offer makes it more cost-effective and convenient for you to expand your measurement locations and make informed decisions for long term success.
