Hach's Flow Solutions by McCrometer offers a comprehensive FLO-DAR® Service Repair Program designed to keep your flow monitoring equipment operating at peak performance. Whether your unit requires routine maintenance or a complete repair, our service team ensures reliability, accuracy, and longevity for your FLO-DAR® system.

\$3,735

Flat-Rate Repair Service

For a competitive flat-rate price, our technicians will diagnose and restore your FLO-DAR® sensor to its optimal condition.

Our repair program eliminates unexpected costs, so you know exactly what to expect. Plus, every repaired unit comes with a 90-day warranty, providing confidence in your investment.

Exclusive Trade-In Offer Upgrade & Save!

If your FLO-DAR® is beyond repair or you're considering an upgrade, take advantage of a 20% discount on a brand-new FLO-DAR® when you trade in your old unit.

**New FLO-DAR® Purchases
Come With 1-Year Warranty**

Comprehensive Repair & Calibration Process

Our trained service technicians follow a factory-standard repair and testing process to restore your FLO-DAR® Sensor to factory specifications and quality:

- **Thorough Diagnostics & Repairs** – Identify sensor issues and replace faulty components as necessary, ensuring your unit functions like new.
- **Velocity, Level, Pressure, and Surge Readings Verification** – Verify if all measurements are accurate for precision data quality. Repaired units undergo pressurization verification to confirm if the level sensor maintains proper accuracy.
- **Desiccant Replacement & Calibration Certification** – Repaired units are evaluated for calibration; this includes replacement of the internal desiccant to protect against moisture damage and extend the lifespan of your FLO-DAR sensor. Once complete, we provide an official calibration certificate to confirm accuracy.
- **Instrument Cleaning** – Hygienic debris cleaning of the sensor unit and technical evaluation to prescribe deep-cleaning procedures where needed to maintain optimal sensor functionality, level reading capabilities, and overall performance.

Customer Satisfaction Promise

Unmatched Expertise in Every Repair
