

Your flow meter, reimagined.

	FPI Mag® 394 (Prior design)	FPI Mag® 394 (2019 design)	FPI Mag® 395 (Prior design)	FPI Mag® 395 (2019 design)
Isolated reference electrodes	No	Yes	Yes	Yes
ProComm compatibility	No	Yes	Yes	Yes
Flow direction	Forward and reverse	Forward and reverse	Forward	Forward
Conductors	9	7	7	7
Battery-power capable	No	Yes	Yes	Yes
Electrode spacing	Derived from pipe ID	Scientifically-placed	Derived from pipe ID	Scientifically-placed

The FPI Mag®

Same great benefits, with enhanced features! The new FPI Mag meter offers continued leading insertion mag technology and full compatibility with the new ProComm converter. The reimagined FPI is the next generation of insertion meter technology, making your flow monitoring efforts even more simple and precise.

Can the new FPI work with my current M-series converter?

No, the new FPI is specifically wired for compatibility with the ProComm and cannot be used with M- and L- series converters.

Does my new FPI 394 need a set of reverse electrodes to be wired?

No, there is no second electrode set. Due to the repositioned sensing electrodes, the new FPI 394 eliminates the need for additional electrodes.

Will all parts ordered for the old FPI 394 be the same as the new FPI?

Yes - parts ordered (including top plates, grounding materials, installation hardware, seal assembly, etc.) will stay the same.
